

virtspawn

Modern Libvirt Virtual Machine Manager

Web UI

REST API

Terminal TUI

Real-time Metrics

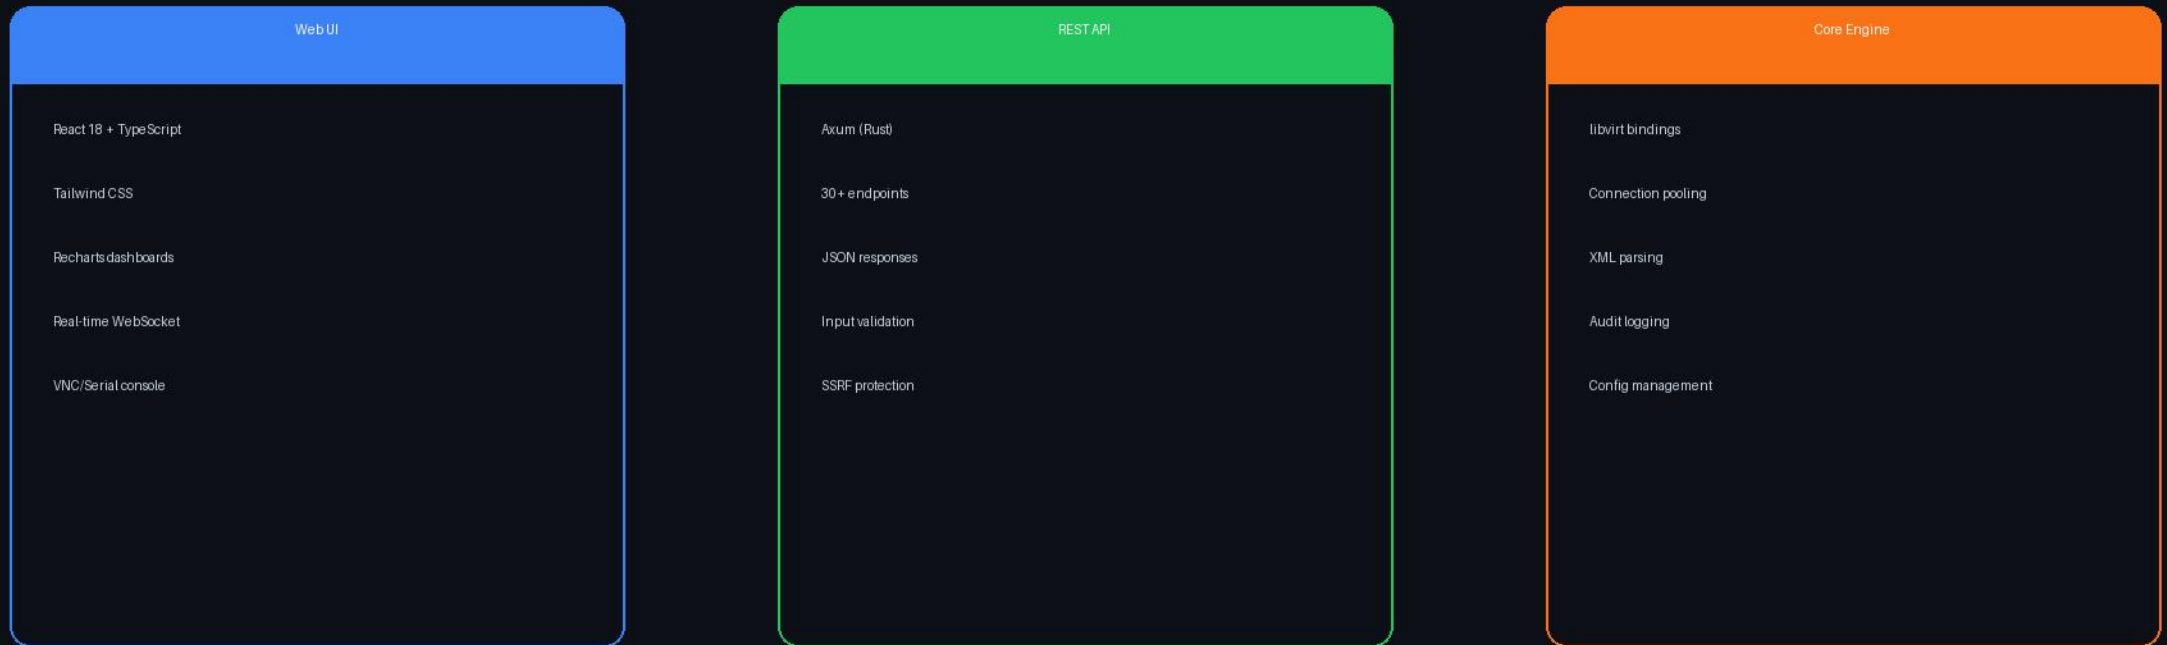

30+ libvirt Features

Built with Rust + React + TypeScript

Secure | Fast | Production-Ready

<https://github.com/ssahani/-virtspawn>

Architecture

Single binary deployment | systemd service | < 10MB footprint

**VNC Not Available**

VM 'photon-os' doesn't have a VNC port assigned. Make sure the VM is running and has VNC graphics configured.

Use the **Serial** console instead, or connect via SSH.

virtspawn

Ready for Production

make && sudo make deploy
